Teva Pharmaceutical Industries Ltd v Mylan Pharmaceuticals ULC

Counsel to Mylan in a NOC proceeding relating to a composition of matter patent over COPAXONE® (glatiramer acetate – a random polypeptide); this was the first and only Canadian generic challenge to COPAXONE®. Teva and Mylan also litigated in the U.S., U.K., Netherlands and elsewhere over this blockbuster product. Canadian proceeding settled before hearing. *(Prior to joining Lenczner Slaght)*
